

```
public Token getTok()
{
    Token tok = null;
    while(!isDone())
    {
        tok = state_.getTok();
        state_ = state_.nextState();
        if (!isWhiteSpaceToken(tok))
            break;
    }
    return tok;
}
```

## State Pattern based Tokenizer
