

#### Company Description:

C Speed, LLC is an engineering design services firm located near Syracuse, NY. We are involved in a wide range of software and hardware development efforts for a variety of national and international clients. Our focus is providing customers with high-quality development efforts to help quickly bring products to market.

#### Openings:

C Speed, LLC is currently searching for qualified applicants for internship positions in the field of quality engineering. Applicants must have a minimum GPA of 3.0.

#### Job Summary:

Co-op students assist in a variety of team-based and independent roles. They support product development efforts through various phases of projects, and are involved in performing Verification & Validation efforts for critical and non-critical hardware and software products.

Quality engineering co-ops will have the opportunity to work closely with the development team and be involved in ongoing efforts throughout the project life-cycle. This includes planning, specification, process improvement, technical documentation, developing and documenting test procedures, executing tests, and generating reports.

#### Required Skills:

Technical understanding of computer hardware and software, electrical and embedded systems a plus; Quality communications and writing skills; Attention to detail and thoroughness

#### Desired Skills:

QA and/or V&V background or experience

#### Majors:

Computer Science, Computer Engineering, Electrical Engineering
