

StatePattern\_Toker Class Diagram

```

public Token getTok()
{
    Token tok = null;
    while(!isDone())
    {
        tok = context._currentState._getTok();
        context._currentState_ = TokenState.nextState(context_);
        if (!isWhiteSpaceToken(tok))
            break;
    }
    return tok;
}
    
```
