How to Find Things

In the overstuffed website

For CSE686 - IP, 687 - OOD, and 775 – DO

The Website address is: https://ecs.syr.edu/faculty/fawcett/handouts/webpages/fawcettHome.htm

You can get to it quickly by googling for "jim Fawcett". Google search puts the site near the top.

1. **Finding course pages:**
   From the home page, use Courses > select course. You find that in the top menu.
2. **Finding lectures:**
   From any course page, click on Lectures, top left, or press the L key.
   From any lecture page, use Lectures > select lecture.
3. **Finding Project Statements:**
   From any lecture page, use Projects > Project #N
4. **Finding code samples:**
   From any lecture page, use Directories, and select Repository/Cpp, or Repository/CSharp, or Repository/Tools
5. **Finding Project Helper Code:**
   From any lecture page, use Directories > cse[crs num] > code > ProjectNHelpS2019
6. **Finding Visual Studio Help:**
   From any lecture page, use Resources > Visual Studio Help
7. **Finding Clean.bat:**
   From any lecture page, use Projects > CodeAnalExes + Clean.bat
8. **Finding Submission Requirements:**
   From any lecture page, use Projects > Submitting Projects
9. **Submitting Projects (Finding Upload Links):**
   From any lecture page, use Projects > Uploading Projects > Course link (use the correct link).
   For this to succeed, your project must be less than 25 MB, so clean your solution and use clean.bat
